run.py	merge Mike: Climate tweaks	:
run_tests.cmd	Initial Git version of the VITA branch	:
version.py	Merge branch 'master' of git://github.com/nursix/eden	:

README.md

Sahana Eden is an Emergency Development Environment - an Open Source framework to rapidly build powerful

applications for Emergency Management.

It is a web based collaboration tool that addresses the common coordination problems during a disaster from finding missing people, managing aid, managing volunteers, tracking camps effectively between Government groups, the civil society (NGOs) and the victims themselves.

Please see the website for more details: <http://eden.sahanafoundation.org/>

Note to developers -- get started here! <http://eden.sahanafoundation.org/wiki/Develop> Before your first pull request, sign Contributor's License Agreement, which protects your rights to your code, while allowing it to be distributed and used in Sahana Eden. <http://bit.ly/SSF-eCLA>
